

“Finding Efficiencies in Software Testing” to be subject of Agilistry & QA Meetup

August 22 webinar being presented by testing expert Melissa Tondi

PLEASANTON, California, August 2, 2017 - [QASource](#), one of the world’s leading software QA services providers, today announced that the [Agilistry & QA Meetup Group](#) will host the free webinar, “Finding Efficiencies in Software Testing,” presented by testing expert Melissa Tondi, on Aug 22.

“We’re pleased to host Melissa’s presentation for the Agilistry & QA Meetup Group,” said Rick Rampton, Head of Client Success at QASource. “This group is meant to be a resource for professionals in the software QA industry, and we’re confident that Melissa will provide valuable insights into how to solve one of testing’s common pain points.”

“Finding Efficiencies in Software Testing,” dives into a common challenge with software testing: Not having enough time to test everything that needs to be tested. In this presentation, Tondi will examine five areas that could be causing inefficiencies in the tester’s overall approach, and offer practical solutions to overcome them.

Tondi will also share areas that can be added or improved upon once the testing strategy is more efficient, and will give attendees an opportunity to share their own challenges and insights.

“Many of us feel like we never have enough time to fully test in a given sprint, cycle or other timeframe,” Tondi said. “We plan for the best-case scenario, but undoubtedly, something often happens with our best-laid plans that causes us to feel like we ‘just didn’t test enough.’”

Tondi, an experienced leader in software testing and a frequent industry speaker, created the Greatest Common Denominator (GCD) approach for determining ways to assess, implement and report on day-to-day activities, with the goal of minimizing the gap between need and value. She is the founder of the [Denver Mobile and Automation Quality Engineering Group](#) and is a board member of the [Software Quality Association of Denver](#). As the director of quality engineering at EMS Software, Tondi assists teams in their efforts to continuously strive for quality software.

The Agilistry & QA Meetup Group is sponsored by QASource. The group provides learning resources and networking opportunities for more than 750 developers, QA testers and other software professionals around the world, focusing on development, scrum, extreme programming, QA and testing, and Agile project management. The Agilistry & QA Meetup Group is free for all software professionals to join.
