

QASource Launches Blockchain Testing Services To Test Smart Contracts and Blockchain Applications

“QASource, one of the leading software QA services companies has stepped into the domain of blockchain testing services to perform a custom and comprehensive set of tests to ensure that errors that cannot be fixed get analyzed and mitigated on time.”

PLEASANTON, California, April 11, 2022 - QASource, the world's leading software QA services company has launched a customized and comprehensive blockchain testing services solution to test blockchain applications for integrity, authorization, non-repudiation, access, confidentiality, and authentication.

Blockchain is an open ledger that multiple parties can access simultaneously, and blockchain testing helps in evaluating its functional components, for example, smart contracts. It involves multiple components like transactions, blocks, wallets, and mining. QASource's [blockchain testing](#) experts will aid in the development of quality stages, ranging from security and quality to the performance and reliability of blockchain applications.

As a key player in the QA testing space, QASource will offer functional testing, peer/node testing, integration testing, API testing, security testing, and performance testing services to ensure that all components involved in the blockchain network are thoroughly validated for operation.

Using the wrong tool would cause problems in blockchain testing. So, to mitigate the challenge of lack of testing tools, QASource will be using Ethereum Tester, Populus, Truffle, Embark, Exonum TestKit, Ganache, Hyperledger Composer, and Corda Testing Tools. It can be said that QASource's professional expertise in blockchain testing will help clients optimize their existing blockchain software platform.

About QASource

Headquartered in Pleasanton, California, with offices in India and Mexico, QASource - because of its portfolio of companies, its offshore and nearshore options, and its core model of dedicated QA teams that extend clients' software engineering teams - offers a suite of Distributed Agile® services to its clients. Since it was founded in 2002, QASource has grown to become an international organization of more than 1100+ professionals servicing a variety of clients ranging from VC-funded startups to Fortune 100 companies. QASource has demonstrated a growth rate of 20% to 50% annually and is a market leader in test automation services. QASource customers have had successful exits exceeding \$15 billion in M&A transactions, leading to the company's tagline, "Quality That Creates Value."
