

QASource Releases Industry Survey on Software QA Staffing "QA Professionals Survey 2018" will examine career trends

PLEASANTON, California, April 23, 2018 - [QASource](#), one of the world's leading software QA services providers, has announced that it is conducting its first industry survey on software QA sourcing, retention, and QA professionals' readiness for disruptive technologies such the Internet of Things, AI and self-driving cars.

[The QA Professionals Survey 2018](#) is intended for both QA professionals and their management. The results of the 5-minute questionnaire will be packaged into a report to be released later this year, intended to supply the industry with staffing insights and to help QA leaders to better understand and cope with these challenges.

"The QA profession is experiencing change at a rapid pace as technological developments, hiring issues, skill gaps and methodologies evolve," said Rick Rampton, Head of Client Success at QASource. "It's against this backdrop that QASource presents this industry survey to study the challenges QA engineers and their organizations face in terms of staffing, training and preparedness for the future."

QASource, whose corporate offices are minutes from Silicon Valley's tech giants, innovative startups, technology research enterprises and top universities, works every day with companies challenged by finding and retaining tech talent. In fact, according to a recent [CareerBuilder study](#), 2/3 of employers are concerned about the growing skills gap in North America.

Rampton said it is his hope that the results of the industry survey will help software leaders understand the scope of the gap and what they can do to plan accordingly.

About QASource

Headquartered in Pleasanton, California, with offices in India and Mexico, QASource - because of its portfolio of companies, its offshore and nearshore options, and its core model of dedicated QA teams that extend clients' software engineering teams - offers a suite of Distributed Agile® services to its clients. Since it was founded in 2002, QASource has grown to become an international organization of more than 700 professionals servicing a variety of clients ranging from VC-funded startups to Fortune 100 companies. QASource has demonstrated a growth rate of 20% to 50% annually and is a market leader in test automation services. QASource customers have had successful exits exceeding \$15 billion in M&A transactions, leading to the company's tagline, "Quality That Creates Value."
