

QASource Presenting Encore Webinar

“The Future is API Testing: Trends and How to Propel Your Testing”

PLEASANTON, Calif., March 28, 2018 - [QASource](#), one of the world’s leading software QA services providers, announced today that due to its popularity, its free webinar entitled, “The Future is API Testing: Trends and How to Propel Your Testing,” will be presented again on Wednesday, April 18.

API testing is poised to overtake - and even eclipse - other forms of software testing within the next five years. CEO Rajeev Rai, who has more than 20 years’ experience in software QA, will help attendees prepare for this shift by teaching them how to leverage API testing to propel their growth, delivering tips on identifying ideal scenarios for API testing in order to achieve the best ROI and the most comprehensive test coverage, offering real-world, usable information and best practices.

Individuals who attend the encore webinar will receive a free takeaway guide that will help them track and monitor their progress as they begin or improve their API testing.

The webinar was first presented March 27 to a capacity audience.

“Technology is increasingly complex, while the evolution from waterfall development methods to Agile/CD/DevOps is driving organizations to seek quick, cost-effective solutions. API testing offers a return on investment that is unparalleled by other forms of testing,” said Rick Rampton, Head of Client Success at QASource. “This webinar builds on QASource’s more-than 10 years’ experience testing APIs to help organizations prepare for the future.”

“The Future is API Testing: Trends and How to Propel Your Testing,” will be held on Wednesday, April 18, 2018, at 10 AM PDT. To reserve a seat for this free, information-packed webinar, visit <https://info.qasource.com/signup/the-future-of-api-testing>.

About QASource

Headquartered in Pleasanton, California, with office in Chandigarh, India, QASource and its portfolio of companies is one of the world’s leading software QA providers. Since it was founded in 2002, QASource has grown to become an international organization of more than 700 professionals servicing a variety of clients ranging from VC-funded startups to Fortune 500 companies.
